(Want these tracks for yourself? Read on for details!!)

Let's just cut to the chase. After being announced in the summer of 2009, the metroid-vania inspired indie game is here! La-Mulana Wii is available **NOW** on the Japanese Wii shop channel for 1200 points. (US version TBD, soon as the red tape/legal stuff gets sorted out.)

So to celebrate I thought I'd highlight some of the tracks (which are also available to download free off of their Japanese site!) I'll be showcasing both the original 'Arranged' version from the PC edition as well as the updated version as it appears on Wiiware.

So hit the jump to sample some of the music!

The Wiiware tracks can be downloaded [here](#) (in addition to several different wallpapers for your desktop!)

And the original PC versions can be found [here](#).
