Thanks to [EarthboundHero](#) I'm slowly working my way through Earthbound on the SNES for the first time!

Today's track is "**Saturn Valley**" from **Earthbound** {audio}http://www.angry-gamers.com/music/14_saturn_valley's_theme.mp3{/audio}}

Please note due to copyright issues I can not make this song available for you to download directly.

I can't believe I missed this game growing up but I was a PC and Mega Drive child. Going through the game now I can definitely appreciate everything from the sprite work to the music to the story. If you're a fan of classic RPGs this is a definite title to check out!
