Hi everyone just a quick note to let you know that I've upgraded the podcast feed to sync with the one currently run on the OLR site [here](#) .

What this means to you:

- One feed so when it goes up on iTunes it goes up on OLR!
- Quicker updates (hopefully).

How do you get the new feed? Most of you who subscribe through iTunes will have the new feed automatically already. For those of you using a third party podcatching software you may need to reenter the URL of the podcast feed. I've tried to make it so anyone pulling the old feed should automatically get the new one but if you're having problems simply [subscribe here](#)

.
