On the Sept 13th episode of Orange Lounge Radio, we start off with a flurry of news from none other than Courtney Love, who is not happy with the likeness of her husband Kurt Cobain being used in Guitar Hero Five. Rejoice as a Commodore 64 emulator makes its way to the iPhone, but then be irritated that it got pulled within moments. A new PSP firmware hits, and a tricky new Arkham Asylum bug outs pirates unknowingly. Clever or entrapment? We debate live on the show with our chatters. In Part B tonight, Final Fantasy 13 FINALLY has a date... in Japan anyway... Silent Hill Homecoming gets cancelled in Japan, and Bethesda files a lawsuit over a Fallout MMO. All of this including your phone calls, e-mails, chatroom antics, twitter topics and more on the interactive show where EVERY gamer has a voice: Orange Lounge Radio (Sorry our feed is behind guys, we will be catching up this week)
