TwitchCon happened this weekend, and although the hosts of OLR couldn't be there in person, we call friend of the show funjon to see what his experiences at the show were like. We recap the big announcements to see what streaming might look like over the next year. There's plenty of video game news for us to get into as well, including Nintendo Switch Firmware getting a big update to version 4.0 and adding video recording for playback on social media.

Also in the news:

* Gran Turismo Sport offline mode

* Activision controversial matchmaking patent

* Anti-Cheat measures in Pokemon Go

* EA Closes Viscreal Games

All this and more on the show where EVERY gamer has a voice-- Orange Lounge Radio!
