

Orange Lounge Radio Episode 318

Written by Deekman

Wednesday, 15 April 2009 06:26 - Last Updated Wednesday, 15 April 2009 06:26

What is the deal with OnLive, and will it really effect the way we buy and play our video games? All sorts of other news pours out of the Game Developers Conference as well, such as new types of DRM, but will they be effective? In part B we talk about Xi, not just what it is in Sony Playstation Home, but how in the heck you pronounce it. All this and more, including the controversial sex community game on xbox live marketplace. As always, we invite our live listeners to join us on the phone and via chat, and we invite everyone to e-mail us and have your say on the show where every gamer has a voice-- Orange Lounge Radio
