Just after our discussions on the last show, it is announced that Netflix is coming to the PS3 after all! How will this change up the console debate? Also, just how much money has the playstation 3 lost Sony... but does it really matter? Chatter is rampant about the effects of piracy on the iPhone, and is it true that there could be another Rock Band spinoff game in 2010? In Part B, we mourn the N-Gage, which we honestly thought was already dead-- oops! We move on to talking about Excitebike World Rally, 3d dot game heroes and... yes... a game that will reward you with STEAK. Interesting. All this and MORE including your chatroom antics, emails, twitter topics and MORE on the show where EVERY gamer has a voice, Orange Lounge Radio!
