Kinect Beta leaks, uDraw, Red Dead Redemption expansions, Jailbreak controversy, Supreme Court hearing, Silver Lining updates, Halo Reach pirating, Final Fantasy 14 Fatigue, Playboy games, The Bible Online and MORE on the show where EVERY gamer has a voice: Orange Lounge Radio!

The gang is back together again for another episode of our show. This week, leaks are flooding out about Kinects beta program. How can you find out if Microsoft is sending a Kinect to your house to test? Also, in a followup to a story from last week, could uDraw be getting first party games from Nintendo? We theorize about the games that we would love to see. The controversial online pass always gets our chatroom hopping and tonight is no exception when word comes out that Sony could be joining in. In part B, we talk about some major Final Fantasy 14 news regarding the new "fatigue" system. It has the community up in arms-- but do we all really think this is such a bad idea? You might be surprised. Twitter topics, phone calls, e-mails and MORE wrap up another week of our show. Stay tuned for our upcoming MARATHON show!
