

Playstation 3 Security, DSi Firmware, Littlebigplanet 2, Digital Arcade Game Distribution, PSP Go, Need for Speed MMO, iOS development, Rock Band 3, Marvel vs Capcom 3 and MORE on the show where EVERY gamer has a voice: Orange Lounge Radio!

We are back after our long marathon episode for some good 'ol fashioned OLR. This weeks show starts with Rob hazing his significant other a bit over what happened while tragedy happened nearby. We talk many more hacks and cracks-- not that we always approve, but it is certainly interesting to see the back and forth between the gaming companies and the hacking community. We talk about the Littlebigplanet 2 beta and why we probably won't be in it :(. Could digital distribution be an idea that might save arcade games? The hosts discuss LIVE with our chatroom.

Twitter topics, Mailbag, FU's and much more round out another episode of the show where EVERY gamer has a voice: Orange Lounge Radio!
