Joining us in studio this week are our pals from another local Sacramento-based video game podcast, Video Game BANG! We get to know the bang gang as gamers, and talk about the week in video gaming, including news that they are going to make a movie out of all things, Tetris. How will Tetris become a sci-fi thriller? Guess we will have to wait for the first trailer to find out.

Also in the news:

- * Minecraft to launch in China
- * Five Nights at Freddys: Sister Location
- * Pokemon Go Beta Testing
- * Uncharted 4 accessibility
